

Modern. Sustainable. Affordable.

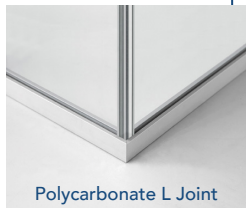

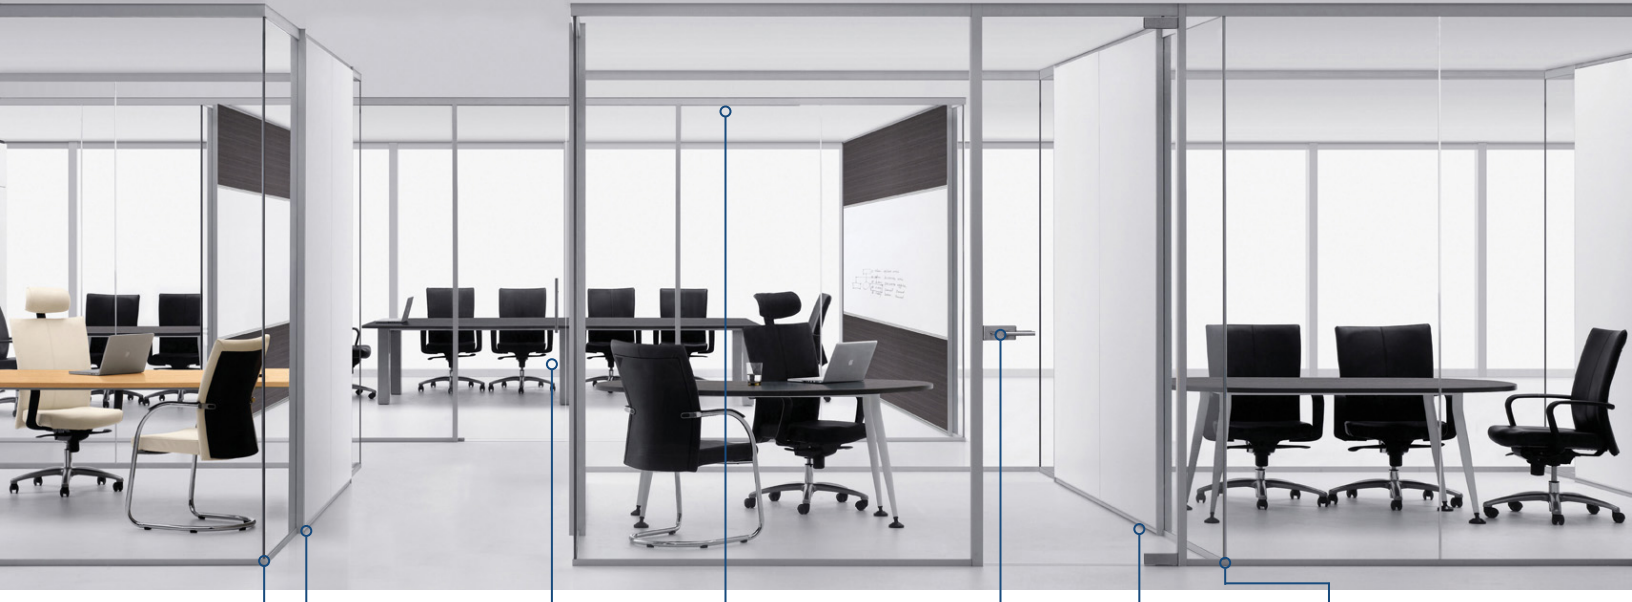

ALUR

Stunning to behold, ALUR's minimalist design is sleek in appearance yet exceptionally strong. The innovative nib wall design provides an elegant transition between front and sidewall, and maximizes light transference into the office. The dividing wall provides multiple tile options for aesthetic and budget preferences and perfectly integrates with the glass wall.

ALUR Wall is a triumph of light transmission, visual and acoustical privacy.

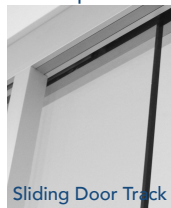

Polycarbonate L Joint

Conversion Post

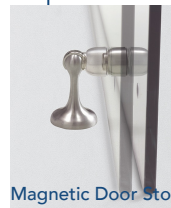

18" Ladder Pull

Sliding Door Track

Euro Profile Locking Handle

Magnetic Door Stop

Polycarbonate T Joint

ALUR Benefits

- ▶ Standard 1/2" tempered glass provides a 36 STC (Sound Transmission Class)
- ▶ Postless option eliminates vertical posts for an exceptionally light scale look
- ▶ Polycarbonate joints are 93% clear and will not discolor or fade over time
- ▶ Tongue and groove joint design provides smooth glass to glass connection, optimal sound seal and minimal deflection
- ▶ Meets IBC 2015 deflection standard for glass walls up to 10' high by 4' wide
- ▶ I, L, T, Y & flexible multi-angle joints facilitate a wide variety of configurations
- ▶ On-site framing provides superior fit and finish
- ▶ Sound seals come standard in all framing, eliminating flanking (sound transference) paths
- ▶ All doors fitted with compression seals to minimize sound loss
- ▶ Glass is sourced locally to reduce cost and carbon footprint, and improve lead time
- ▶ ADA complaint hardware options: Single action lever set; Top locking ladder pull; both with 7-pin SFIC
- ▶ Multiple frame finishes: Bead-blasted aluminum; Black, White and Bronze PVDF resin; Polished aluminum
- ▶ Sliding doors are concealed on the backside of doorframe with no exposed hardware for a streamlined look
- ▶ Dividing wall provides a 42 STC in just 3 1/2" thickness for superior sound control
- ▶ Dividing wall can be configured both vertically and horizontally for a variety of aesthetic and functional preferences
- ▶ Built-in furniture rails allow for off-modular placement of furniture components for greater flexibility
- ▶ Seismic approved for use in CA
- ▶ 2 week lead time quick ship program¹
- ▶ System qualifies for 100% first year tax depreciation under Section 179c for a savings of 36% compared to construction²
- ▶ Qualifies for LEED points
- ▶ AutoDesk Revit Software with VR (virtual reality) 3D capability
- ▶ Lifetime warranty³

¹Certain restrictions apply; Check with ALUR customer service prior to order

²Consult with a qualified tax professional to verify eligibility

³With exceptions; Refer to ALUR warranty for details
